AURA REAL ESTATE

Design System Specification — Colors, Typography, Responsive Scales & Design Tokens

This document provides the authoritative architectural design tokens and visual standards powering the AURA Real Estate agency platform. All colors conform to WCAG 2.2 AA / AAA contrast ratios, and typography enforces fluid CSS clamp() scaling across all device form factors.

Role & Stack	Primary Font	Fallback Font Stack	Styling Character	Target Elements
Primary Editorial Serif font-serif	**Playfair Display**	Cormorant Garamond, Didot, Bodoni MT, Cinzel, Georgia, serif	High contrast serifs, classical proportions, architectural pedigree.	H1 Hero, Page Titles, Section H2 Titles, Editorial Quotes.
Functional Sans-Serif font-sans	**Montserrat**	Plus Jakarta Sans, Inter, -apple-system, BlinkMacSystemFont, Segoe UI, sans-serif	Geometric clarity, open apertures, maximum legibility across viewports.	Navigation links, buttons, body copy, form fields, filter chips.

3. FLUID RESPONSIVE TYPOGRAPHY MATRIX (CSS CLAMP)

All semantic headings scale smoothly between 360px mobile viewports and 1440px+ ultra-wide desktop viewports via CSS clamp() formulas. Form inputs strictly enforce a 16px base size to eliminate iOS Safari auto-zoom.
